WORK EXPERIMENT

March 2016 – Now

SISLAB MEMBER – DIGITAL DESIGN

SISLAB is VNU Key Laboratory of Smart Integrated System. I made IOT application product using ARDUINO KIT (get sensor data and control via the internet).

November 2016 – August 2017

HARDWARE IMPELENTATION - HUMAN DETECTION

This project from LSI Design Contest 2017: Human detection by HOG. I got the prize in student research contest. A part of the project has used to write a paper.

July 2016 – Now

SISLAB-TOSHIBA PROJECT – LOW POWER

I am a student member of this project. We have research about a low power approach for multi-core hardware.

SKILL

LINUX – SHELL

VHDL

C/C++

ENGLISH

EDUCATION

2014 - 2018

VNU University of Engineering and Technology (VNU-UET)

My major is Electronics and Communication. Key objects: C/C++ programming, Digital Signal Processing, Digital Design, Embedded System...

GPA: **3.11** / 4.0. I got the prize in student research contest.
